PyroGuard FR Barrier Fabric

PyroGuard is a MADE IN USA fire retardant barrier fabric designed to enable foam mattresses to meet FR criteria such as CFR 1633 and 1632. It is supplied in stretch knit tubular form in order to accommodate a wide variety of mattress dimensions. PyroGuard is manufactured without the use of glass ,silica loaded rayon, modacrylic, melamine, antimony, phosphorous or chlorine. It is compliant to California Proposition 65, Oeko-Tex 100 standards and Washington State CHCC

Product:	905
Size:	Tubular Queen
Construction:	Rib Knit Fabric
Content:	Cotton/ Polyester
Density:	6.0 oz. per square yard
Packing:	Approximate 80 yds per roll
Core:	2" corrugated
Properties:	FR, No Melt, No Drip
Country of Origin:	USA
Target Tests:	CFR 1632, CFR 1633, NFPA 701

Each mattress manufacturer is responsible for conducting tests of each mattress configuration to a particular standard for FR and physical performance. Fabrics alone cannot be certified to pass these tests.
